 - Data product development, testing, cloud infrastructure, analytical databases

What Sets Us Apart

Double Stop Consulting was started in 2024 by a civil engineering / water resources PE with a decade of experience in the tech industry. We seek to apply both technological best practices and high engineering standards to support execution of our clients' projects.

Past Experience

- Developed energy modeling of buildings for an electrification non-profit
- Data engineering work for an energy analytics startup

Most Relevant NAICS codes:

541330 - engineering services [primary]
541370 - (GIS) mapping services
541511 - custom computer programming
541512 - computer software consulting
541620 - environmental consulting
541715 - R&D in physical/engineering sciences
